

## ► Applications

- » Biodiesel filtration
- » Waste water filtration
- » Ink
- » Paint
- » Drilling fluids
- » Car wash sumps
- » Sugar solutions
- » Cutting fluids
- » Water processing
- » Petrochemical operations
- » And more!

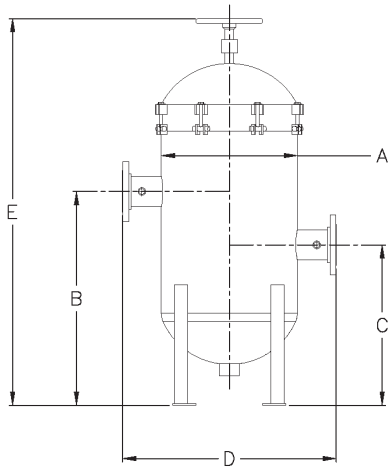

## ► Bag Filter Vessel

Our bag filter technology includes; single bag filter housings, multi-bag filter housings, duplex bag filter systems, and engineered to order bag filter systems. High quality housings are designed to be user friendly and simple to operate, offering an economical way to remove dirt, scale, grit and other contaminants from downstream processes. Bag filters are available in a variety of media; nylon, polyester and polypropylene felts, multi-filament material, cotton mesh, teflon, and gore-tex. Available sizes include ranges from 0.5 micron to 2000 micron.

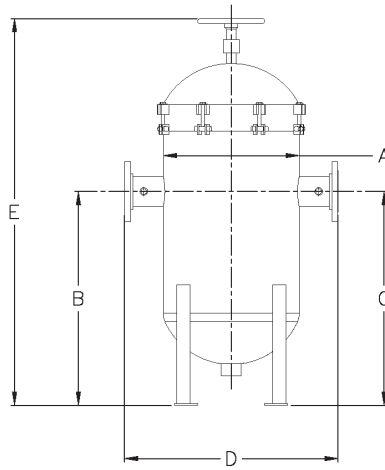

## ► Features

- Carbon steel, 304 stainless steel or 316 stainless steel housings
- ASME code or non-code vessel
- Uses standard # 2 filter bags, but can accommodate practically any liquid bag filter in the market today
- Flow rates up to 5,000 gpm per vessel
- Skid mounted duplexed units are an available option
- Swing bolt lid closure
- Wheel or hydraulic jack headlift
